Adaptable residue systems for all combines.
Rekord gives each farmer all processing alternatives built-in, at a minimum of horse power.

COMBI system.

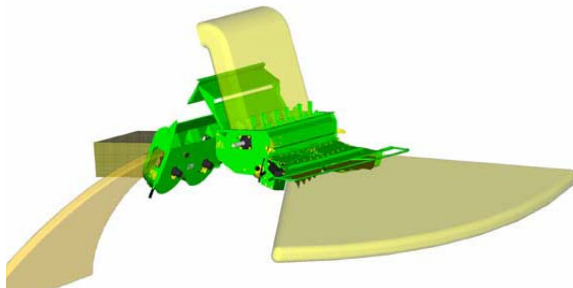

Offers ultimate flexibility for all straw walker combines.

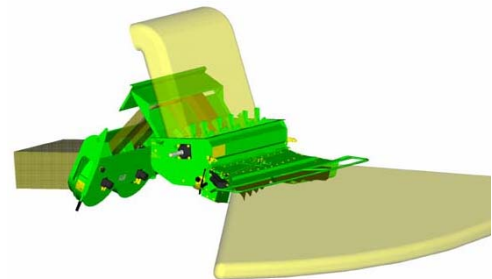

The chaff is spread separately and the straw is windrowed.

Chaff and straw is windrowed together.

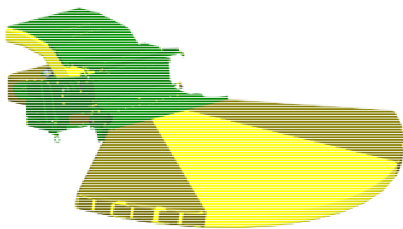

The chaff is spread separately and the straw is chopped and spread on top.

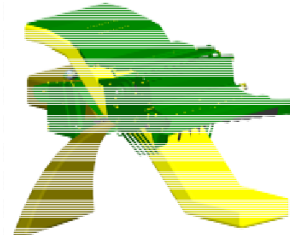

The chaff is thrown into the chopper; straw and chaff is chopped and spread together.

PLUS system.

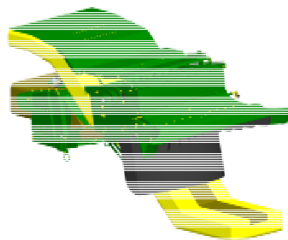

Supports all rotor combine capacities and all header sizes

Spreading width and evenness are increased by delivering the chaff through the tailboard.

The chaff is spread smoothly when the straw is windrowed.

Chaff and straw is windrowed together.
